Art Unit:

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-12 and 14-15, drawn to topical cosmetic composition of matter containing various specific glucan compounds classified in class 514, sub-class 60
- II. Claim 13, drawn to a linear poly-alpha-glucan compounds classified in class 536, sub-class 1⁺.

Patent Cooperation Rules (PCT) Rules 13.1 and 13.2 permit in a single application only one invention. Thus, an application presenting more than one unrelated invention, as in the instant case, is appropriately restricted for lack of unity.

The above delineated inventions are independent and patentably distinct each from the other. The grouped inventions are a compound, useful for any purpose, and a composition of matter containing specific glucan compounds. These inventions differ as to their physical form and intended use, a reference which would anticipate the invention of one group would neither anticipate, nor make obvious the inventions in the other groups. The searches are not co-inclusive as indicated by the diverse classification of the subject matter. One skilled in the art would readily practice the invention of one of the above groups with out infringing and or practicing the invention of another group. The subject matter is unique and has acquired a separate status in the art and is fully capable of supporting separate patents. For the foregoing reasons restriction is proper for examination purposes.

Art Unit:

Applicant is reminded that upon the cancellation of the claims to a non-elected invention, the inventor ship must be amended in compliance with 37 C.F.R. 1.48 (b) if one or more of the currently named inventors is no longer an inventor if at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a diligently filed petition under 37 C.F.R. 1.48 (b) and by the fee required under 37 C.F.R. 1.17 (h).

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variations or clearly admit on the record that this is the case. In either instance, if Examiner finds one of the inventions unpatentable over the prior art, the evidence may be used in a rejection under 35 USC 103 of the other invention.

Any inquiry concerning this communication should be directed to Russell Travers at telephone number (703) 308-4603.
